

## Vehicle Health - Stop Breakdowns Before They Happen

**Keep your vehicles on the road.** Prevent damage before it leads to expensive breakdowns, out-of-service events, and run-time delays. GreenRoad Vehicle Health gives you total visibility into the vital signs of your vehicles, allowing you to fix issues well before the “check engine” light goes.

### Keep Your Business in Top Working

GreenRoad Vehicle Health focuses on the systems that keep your vehicles - and your business - performing on time and delivering outstanding customer service.

The information provided by the system’s real-time monitoring reduces operating costs and frees up valuable engineering resources. Its exception reports and alerts help you minimize maintenance costs and keep your vehicles on the road. As a result, you are able to keep to your schedule, maximize utilization of manpower and capital equipment, and improve vehicle ROI.

### Critical Vehicle Health Insights

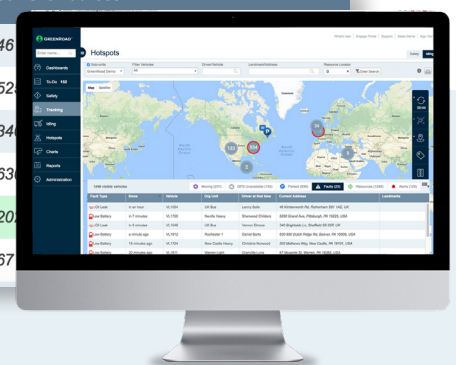

GreenRoad connects with vehicle engines to continuously monitor their critical systems. It tracks the vital signs of your fleet and uncovers mechanical failures at their first appearance.

### The Data You Need, When You Need It

Tailor Vehicle Health Alerts to the unique needs of your fleet. Set performance cut-offs and policies to specify when performance slippage requires your attention.

Configure real-time alerts for instant notification of mission-critical mechanical faults that can lead to safety concerns or costly breakdowns. Set channels for each alert and recipient, choosing between SMS, email and GreenRoad Central dashboard notifications.

Fault Type	Since	Vehicle	Org Unit	Driver at that time	Current Address
Oil Leak	in an hour	VL1054	UK Bus	Lenny Solis	46
Low Battery	in 7 minutes	VL1720	Neville Heavy	Sherwood Childers	52
Oil Leak	in 5 minutes	VL1046	UK Bus	Vernon Elmore	34
Low Battery	a minute ago	VL1812	Rochester 1	Daniel Barto	63
Low Battery	15 minutes ago	VL1724	New Castle Heavy	Christine Norwood	20
Low Battery	22 minutes ago	VL1811	Warren Light	Granville Luna	67

## Monitor

Monitor the overall health of your fleet on GreenRoad Central, and drill down to investigate issues with individual vehicles and operating units.

The Vehicle Health Faults dashboard provides a bird's eye view of all outstanding issues in near-real time. Quickly assess the overall impact of mechanical issues on the fleet, and triage fault mediation to optimise quality of service.

To proactively address mechanical issues, pinpoint the location of vehicles with active faults and direct them to the nearest service centres.

## Manage and Act

The system's live data and historical trends keep you on top of the mechanical status of each and every vehicle in the fleet, and for the fleet as a whole. Use its reports and screens to identify severe faults at a glance, and to zoom in for detailed information.

Follow-up reports keep you focused on the problems that need attention. Manage and act on chronic or recurring issues that point towards faulty maintenance or problematic driver behaviour.
